1/8/47 HPS 2.8.47

J.O.No. 114 /M.4. Dated: 31st July 1947. 1st August 1947.

Returned with compliments.

3) The present scale in the Proposition statement has been verified and necessary corrections have been made therein in the following cases:-

a. Mysore Circle Office. - Twelve clerks (7 + 5) are shown by the Chief Engineer against the grade s.30-3-45. The permanent strength is only six according to G.O.No.PW 4249-50/Est 73-4-2 dated 10-1-1947.

b. Shimoga Circle. - Two lascars are shown in the statement against one lascar sanctioned.

1) The proposition statement does not show the temporary establishment separately as required in Article 71 M.C.A.C. Volume I. The following

NOTE—Contn. Sheet.

Reconstitution of the three Circles of Superintendence

File No. of 194 . | Public Works Secretariat

Serial No.

following temporary establishments are shown therein and are retained in the statement:-

(a) Mysore Circle - five clerks on 30-3-45 are temporary and their continuance is sanctioned only till the end of June 48.

(b) Irrigation Circle Office, Mysore

One clerk in each of the two grades of ~~Rs.50-4-70 and Rs.30-3-45 sanctioned for Nugu~~ Reservoir Works.

5. Due to corrections referred to in para (1) above, extra cost per annum amounts to Rs.6,741.

Auditor, P.W.D.

S.S.31.

6. In the proposition statement both the permanent scale and the temporary ones have been clubbed together, as also the hands specifically for projects. In the ordinary course, the permanent strengths of the three Circle Offices should have been shown distinctly and their distribution among the three new Offices with any extra hands or reduction as may be necessary. The hands for purposes of special works should have also been separately shown against each of the three proposed Offices, within whose jurisdiction the works come in. The following additional hands are included

Circle Office at Bangalore — one Clerk on Rs 30.3.45
Circle Office at Hubli — one addl Cashier on Rs 11.
Circle Office at Mysore — 1 clerk on Rs 70-5-95
2 clerks on Rs 50-4-70
3 clerks on Rs 30-3-45
1 draftsman 55-5-80.

Reconstitution of the three Circles of Superintendence

Serial No.

For the Central Office one Senior Clerk on Rs 70-5-95 is proposed in addition to the existing strength consisting of 1 Supdt. 2 Clerks on Rs 50-4-70 and 4 on Rs 30-3-45. The need for an extra

A. Senior hand is not clear especially when there is a tendency for reduction in the volume of work after the completion of the main project work.

B. The three Circle Offices as now proposed will have the following Divisions attached to them :—

Bangalore Circle.

Bangalore Div, Kolar Div. Tumkur Division and the Bangalore Railway Div

Mysore Circle

Mysore Div. Mandya Div. Bridges Div at Mysore and all the Irrigation Circle Divisions and the Hassan Division.

Shimoga Circle

Shimoga Div, Kadur Div, Chitaldrug Div. and Irrigation Div at Chitaldrug

The Chief Engineer R & B. has proposed that the Junior Taluks Restoration

NOTE—Contn. Sheet. ..

reconstitution of the three circles of Superintendence

Serial No.

Rangers, already existing and now sanctioned, may be attached to the respective circles wherein they lie. But the Chief Engineer for Development considers that the Senior Tanks Restoration Circle should as sanctioned exist as such to perform its specific duties.

8 If however it is considered urgent, proposals may be sanctioned with a proviso that the existing permanent establt be distributed among the three Circles, temporary hands be continued on the same tenure and separate proposals with a fresh proposition Statement as indicated in para 3 be submitted making a case for increasing the strength permanently.

Water Supply Dn and Cement Concreting Rs... only two left over. re-the

Govt 9. This requires financial concurrence and constitutes a Council matter.
5784)

10. Secy. HPS 5.8.'47

11. The Chief Engineer Roads and Buildings, has stated that owing to the large increase in the programme of Buildings, in Bangalore and Mysore, and the also to the increase in Concreting Bridges, the present administrative Circles of Mysore and Shimoga have become too heavy

Reconstitution of Three Circles of Superintendence

Public Works Secretariat | File No. | of 194 . | [App. F. III-2

Serial No.

We especially the Mysore circle needs redistribution with the present additional charges of Irrigation and road programme in the retrenched area of Civil Military Stations. The case for redistribution is not additional circle, has become stronger. Colonel has suggested the works to be redistributed among the three circles without adding additional circle. Bangalore and Shimoga Chief Engineer for Irrigation in agreement has forwarded his proposals for the same. He however feels that there is a necessity for a separate circle for Minor Tanks and that this should not be mixed up with the proposals.

12. The distribution proposed are as noted in Para 7. It may be stated that the combined circle at Mysore may perhaps be with the Bangalore.

13. The proposal in Statement as submitted needs reconsidering for reasons noted in Para 6. In the experience of Circles and Divisions I feel that certain readjustment of establishment regarding the nature of works assigned to each individual and to ensure efficiency and quick disposal is necessary. Separate proposals, in the light of experience will be submitted for orders of Govt.

14. There is no need for any change in the central office to a senior hand for reasons noted in Para 6. A

15. At the Works at Bangalore and Mysore are reported to be suffering. Sanction to the proposals may be given, as noted in

Date 12/8/47

Redistribution of Divisions among Circles in the P.W.D. etc.

A note re the distribution of Divisions among the Mysore, Shimsha and Irrigation Circles has been submitted separately with reference to the proposals received from the CE. The new Bore Circle as proposed to be reconstituted therein will have (1) Mysore Div (2) Mandya Div (3) Hassan Div (4) Bangalore Div at Mysore (5) K.R.S. Division (6) Cauvery Channels Div (7) Irwin Canal North Div (8) Irwin Canal South Div (9) Upper Channels Div. This will comparatively be a very heavy Circle and would require a redistribution before long. Though all the works and centres in these Districts of Mysore and Mandya have still they require undivided attention due to expansion of irrigation, regulation of supplies to the Govt. in the agricultural season.

2. The Major Reservoirs Division, specially constituted for the Major Reservoir Works in Heggadadevankote Tq. Costing Rs 81 Lacs is now attending to these works and they are in the interior of Mysore Forests & they require constant supervision & frequent distraction over all these

NOTE—Contn: Sheet.

Redistribution of Divisions among Circles in the P.W. Dept

Serial No.

the river portions are tackled. As the works progress, it would be necessary to constitute one more Division solely for the excavation of long length of the Channel from the Main Reservoir which is a constituent factor of this irrigation project. The redistribution of the Tuppone circle, as now proposed to be reconstituted, including the Main Reservoir works, will become all the more imperative with the increasing progress ~~on~~ the Main Reservoir Scheme.

3). In the Valuar parts, the most important Scheme now execution is the Sakkarai Reservoir Project, which is a Combined hydro electric and irrigation project costing Rs 890 lakhs, and the next comes the Tunga Anicut Costing Rs 70.0 lakhs. These works are in progress for a number of years and even after their completion they would require a suitable permanent establishment for their maintenance works and other allied works such as regulation of water for Irrigation, &c. In view of the ~~force~~ going and of future expansion, it may perhaps be necessary to have two Circles of Superintendence for Irrigation purely, one being for all irrigation works connected with the Tungabhadra valley system which would comprise Sakkarai Reservoir Tunga Anicut

Re distribution of ~~[illegible]~~ divisions among circles in the P.W dept

Public Works Secretariat | File No. of 194 . | [App. F. III-2

Serial No.

and other irrigation works in that area & the Second lining for all works, existing and new, in the Cauvery Valley. Two more circles of Superintendence will be necessary for normal irrigation works and roads & buildings works in the nine Districts, excluding the works to be assigned to the two irrigation circles of the Tungabhadra Valley and the Cauvery Valley irrigation.

4) The Chief Engineer for Roads and Buildings has been separately asking for re-deployment establishment for roads and buildings works in the State due to expansion of activities of the P.W.D. department in that direction.

5) In connection with the Circle of Superintendence for Minor Tank Restoration works as per approved ten year programme the Minister for Agri & P.W. has remarked "I am thinking whether we should have a Superintending Engineer solely for Minor Tank Restoration work or whether the number of circles should be increased by one more circle and redistribute the work among the three Circles."

6) Taking all the above aspects of the case it is for consideration whether a redistribution of circle jurisdictions may not

NOTE—Contn. Sheet.

Redistribution of divisions among circles in the P.W. Dept.

File No. of 194 . | Public Works Secretariat

Serial No.

be made as under:—

Circle	Divisions
1. Mysore Circle. (HD Qrs Bangalore or Mysore) (Bangalore transferable)	1 Bangalore Dn. 2 Mysore Dn. 3 Tenkanikota Dn. 4 Bangalore Pavlongs Dn. 5. Mysore Pavlongs Dn. and (Mun or Taluk Ranges in the Districts)
2. Shimoga Circle (HD Qrs Shimoga)	1. Shimoga Dn. 2. Hassan Dn. 3. Kadur Dn. 4 (Mun or Taluk Ranges in the Districts)
3. Tumkur Circle (HD Qrs Tumkur)	1. Kolar Dn. 2. Tumkur Dn. 3. Chitaldrug Dn. 4. Davangere Dn. 5 (Mun or Taluk Ranges in the Districts)
4. Davangere Circle (HD Qrs at Davangere)	1. K.R.S. Dn. 2. Lower Lakes Dn. 3. Irrigation Canal Works Dn. 4. Tungabhadra Canal Works Dn. 5. Upper Lakes Dn. 6. Major Reservoirs Dn. 7. Mun or Taluk Restoration Ranges

NB. The Junior Works Restoration Ranges, existing and since sanctioned, will be under the Concerned Circles within whose jurisdiction or in the respective Divisions or Districts within which they lie.

11/8/W 7) Proposals received from the Chief Engineer for Irrigation to re-distribute the Several Divisions amongst the three existing circles reducing the Work of the Mysore circle, to ensure better supervision of the buildings in Mysore and Bangalore are before Government. The Chief Engineer for Irrigation, differing from the Chief Engineer Roads

Redistribution of divisions among Circles in the P.W. Dept.

Serial No.

Want to have a separate circle of Superintending Engrs. ~~of Superintendents~~, for the main Tank Restoration, as sanctioned and the distribution proposed are only of the divisions except Main Tank Restoration ~~Circles~~ Ranges

8) Both the proposals - it is submitted - seem to lack realities, with certainly no actual consideration for the future development. They seem to be of 'ad hoc' nature.

9) Irrigation circle, with the additions as proposed will be very heavy - for reasons noted in Para 2. The Nuguneres are all works costing a crore of rupees ~~work~~ is attached to the irrigation circle. This need it be by the Superintending Engineer to Saidapet for the works to this circle is ~~to~~ not at all desirable. This circle as proposed may be some what manageable, and will have to be distributed again ~~after another year~~ to

10) Regarding the proposal of the Chief Engineer for Irrigation, to have a separate circle for Main Tank restoration, it will, certainly not conduce to the better Supervision of the Works & attend to the duties of the State - as enunciated by the Minister when the Scheme was sanctioned (vide Flagg para 25 c). Further when the proposal of the Chief was sent up, information Minister has given was intended, that as noted in Para 5 of the (Flagg) the number of circles including the Restoration ~~circle~~ might be increased, and the work distributed

OFFICE OF THE MINISTER FOR AGRICULTURE AND PUBLIC WORKS 13 AUG. 1947 No. 1345

NOTE—Contn. Sheet.

Redistribution of divisions among Circles in the PW dept

File No. of 194 . | Public Works Secretariat

Serial No.

20) There are at present two Circles of Superintendence in the State excluding the Irrigation Circle which is in charge of all the Irrigation Divisions in Mysore, Mandya and Hassan Districts. The Superintending Engineer, Mysore Circle is in charge of all the Divisions in Bangalore, Tumkur and Kolar Districts and all the Roads and Buildings Divisions in Mysore and Mandya Districts. The Superintending Engineer, Shimoga Circle is in charge of all the Divisions in Shimoga, Chikmagalur, Chitaldrug and Hassan Districts including the Irrigation Division in Chitaldrug. The Chief Engineer for Roads and Buildings has reported that on account of a large number of Roads and Buildings works undertaken in recent times and also a large number of Irrigation works taken up in Chitaldrug District the work in both the Circles has increased enormously involving great delay in the scrutiny and submission of estimates to the Central Office. He therefore proposes that an additional Circle may be constituted to give relief to the two existing Circles by appropriately distributing the work among the three Circles.

21) The Chief Engineer for Irrigation has sent up proposals for redistfibuting the work among the existing two Circles and the Irrigation Circle, tacking on the Roads and Buildings Divisions of Mysore and Mandya Districts also to the Irrigation Circle, with Headquarters at Mysore. He further proposes to shift the Headquarters of the existing Mysore Circle Office to Bangalore with jurisdiction over all the Division Offices in Bangalore, Kolar and Tumkur Districts. He also proposes to have a new Circle sanctioned by Government to be solely in charge of special Ranges

Serial No.

constituted for restoring minor tanks in the State. This arrangement gives no relief whatsoever to the Superintending Engineer, Shimoga Circle.

22) The Secretary, Public Works Department has, in his note suggested that the Irrigation Circle may be left as it is with jurisdiction over all the Irrigation Divisions in Mysore and Mandya Districts which are in charge of Irrigation works and old and new channels in Mysore, Mandya and Hassan Districts. The old channels like the Hullahalli channel, Ramaswamy channel, Uddur and Hanumanthapur channels require remodelling immediately and the concerned Divisions are preparing comprehensive estimates for improving and remodelling these channels. These works when sanctioned and put into execution require constant supervision. In addition to these works, the Irrigation Circle is in charge of the new Nugu project at an estimated cost of Rs. 81 lakhs recently sanctioned by Government. In these circumstances, it does not seem desirable to tack on any more work to the Irrigation Circle. The Public Works Secretary proposes that the work may be redistributed among the two existing Circles and the new Circle sanctioned by Government in connection with the postwar scheme of restoration of Minor tanks. According to his proposal the Superintending Engineer, Mysore Circle will have jurisdiction over the Mysore Division, Buildings Division, Mysore; Mandya Division, Bangalore Division and Buildings Division, Bangalore and also all the Minor Tank Restoration Ranges in these three Districts. The Superintending Engineer, Shimoga Circle will have jurisdiction over all the Divisions in Shimoga, Chickmagalur and Hassan Districts, except the Tunga Anicut Division which is in the jurisdiction of the Special Officer, Lakkavalli Project and all the Minor Tank Restoration Ranges in these three districts. A third Circle is

Creation of additional Circle at Tumkur.

proposed to be constituted with headquarters in Tumkur having jurisdiction over all the Divisions in the three districts of Tumkur, Kolar and Chitaldrug including the Irrigation Division, Chitaldrug and all the Minor Tank Restoration Ranges in these three districts. The above arrangement suggested by the Public Works Secretary gives relief to both the Circles of Mysore and Shimoga and has the merit of equitable distribution of work. Each Circle will have compact area for supervision of works. I am, therefore, inclined to accept the suggestions of the Secretary, Public Works, to distribute the work among the two existing Circles and a third Circle already sanctioned by Government in their Order dated 17th October 1946.

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

PUBLIC WORKS SECRETARIAT.

G. O. No. P. W. 3555-69—Irn. 2-45-258, dated 6th December 1946.

Scheme for the restoration of 4,800 minor tanks.

Sanctions a —— in the State during the next ten years.

READ—

Letter No. E. C. 1636—45-46, dated 22nd March 1946, from the Commissioner for Economic Development and Planning in Mysore, forwarding the scheme prepared by the Chief Engineer for Irrigation for the restoration of 4,800 minor tanks in the State at a cost of Rs. 240 lakhs spread over a period of ten years.

2. U. O. Note No. 3192—S., dated 22nd May 1946, from the Chief Engineer for Irrigation on the subject.

3. Letter No. E. C. 2270—45-46, dated 11th June 1946, from the Commissioner for Economic Development and Planning on the same subject.

ORDER No. P. W. 3555-69—IRN. 2-45-258, DATED BANGALORE, THE 6TH DECEMBER 1946.

The Chief Engineer for Irrigation has prepared a scheme for the restoration of 4,800 minor tanks in the State at a total cost of Rs. 240 lakhs during the next ten years. The Policy Committee for Public Works and Transport and the Committee for Co-ordination and Finance while approving of the scheme have recommended the acceptance of the following principles as an emergency measure :—

(1) The raiyats' contribution for the restoration of minor tanks need not be insisted upon for the present (for the next 2 or 3 years).

(2) Constitution of an appropriate number of ranges and entertainment of a Special Officer of a Superintending Engineer's rank with enhanced powers of sanction and with suitable staff for administration of the minor tank restoration.

(3) The limit of 48 years' assessment in respect of estimated cost of work may be waived and estimates sanctioned having regard to the utility of the tank.

(4) Acreage cess may be levied and the maintenance of tanks taken over by the Government.

2. The Chief Engineer for Irrigation, whose views were invited on the recommendations of the Committee, has opined that the recommendations excepting No. 4 regarding maintenance to tanks may be accepted. With regard to maintenance works to tanks, he has emphasised the need for this work being got done by the atchkatdars of the tanks themselves.

3. Government, after due consideration, are pleased to sanction (1) the scheme for the restoration of 4,800 minor tanks in the State at a cost of Rs. 240 lakhs during the next ten years, and (2) the recommendations of the Policy Committees, with the following modifications :—

(*a*) The creation of the post of Superintending Engineer (with necessary staff) is sanctioned to work out the scheme both of restoration and maintenance of minor tanks in the State, and

(*b*) The maintenance of minor tanks after restoration may be taken over by Government as facilities for adequate staff are, or become available. Wherever such maintenance work is undertaken by Government, a cess of rupee one per acre should be collected from the raiyats, the existing liability of the raiyats for doing the maintenance work continuing in other cases where it is not so undertaken by Government.

4. Detailed proposals in regard to the establishment, etc., required for the Superintending Engineer and for constituting other ranges, if any, may be submitted very early.

K. D. JOSHI,
Secretary to Government,
Public Works Department.

To—The Commissioner for Economic Development and Planning.

Rajasevasakta N.V.Bapat, Esq., B.A., C.E.,
Chief Engineer for Roads and Buildings.

D.C.NO.960

Office of the Chief Engineer for Roads and Buildings in Mysore,
Bangalore, Dated the 11th April 47

Dear Mr.Narasimhaiya,

HPS 12-4-47

On account of the large increase in recent years in the programme of building works, concreting and other road works and Bridges, etc., and also on account of the very large number of Irrigation Works taken up in the Districts it is found that the Administrative work in the Circle Offices at Mysore and Shimoga has considerably increased.

Particularly due to the fact that a large number of new Building works in Bangalore and Mysore are undertaken the work in this regard in the Mysore Circle is getting very heavy, causing very often considerable delay in the disposal of the schemes. I am of opinion and I hope you will agree with me that it has now become necessary to form one more Circle Office with Head-quarters at Bangalore and having jurisdiction over the works in the Bangalore, Tumkur and Kolar Districts. To the Mysore Circle, will be attached Mysore, Mandya and Hassan Districts and the Shimoga Circle will have the remaining 3 Districts viz., Shimoga, Chitaldurg and Chickmagalur

I request that you will take necessary action in the matter to obtain sanction of Government as early as possible to the above proposal.

Yours sincerely,

Sd. N.V. Bapat,

To
Rajakaryaprasakta
M.Narasimhiva, Esq., B.A., C.E.,
Chief Engineer for Irrigation in Mysore,
Bangalore.

D.O.No.1019-20 dated 28th April 1947 from the Chief Engineer for Roads and Buildings, Bangalore, to the Chief Engineer for Irrigation in Mysore, Bangalore.

Ref: This office D.O. re: forming a new Circle at Bangalore.

In continuation of the above, I write to state I have once again thought over this question and now consider that it would be more advantageous and certainly more economical for the present to redistribute the work of the three Circle Offices as follows:-

1. Irrigation Circle which may be called Mysore Circle with Head-Quarters at Mysore, having jurisdiction over

1) All the Irrigation Divisions, as at present.
2) Mysore Division
3) Mandya Division
4) Buildings Division, Mysore
5) Minor Tank Restoration Ranges if any

The office staff of the present Irrigation Circle will have to be strengthened to cope with the extra work. Since the Superintending Engineer, Irrigation Circle, has been going over now practically over the whole area of Mandya and Mysore Districts he will be able to do the extra work involved.

II. Bangalore Circle - Head Quarters, Bangalore, having jurisdiction over

1) Bangalore Division
2) Tumkur Division
3) Kolar Division
4) Hassan Division
5) Buildings Division, Bangalore
6) Cement Concreting Division, Bangalore
7) Minor Tank Restoration Ranges if any.

The present office staff of the Mysore Circle will continue. Immediately, a rented building will have to be engaged for the present to locate the office in Bangalore.

III. Shimoga Circle -Headquarters, Shimoga, having jurisdiction over

1) Shimoga Division
2) Kadur Division
3) Chitaldrug Division
4) Chitaldrug Irrigation Division
5) Minor Tank Restoration Ranges if any.

Since work in the malnad and particularly in the Chickmagalur District has not been receiving sufficient attention, the Superintending Engineer with his existing jurisdiction thus reduced, would be able to devote more prompt attention to the many works to be done in these districts.

If there is no objetion to this proposal, I would request your sending up the above proposal with the required proposition statements for the consideration and orders of Government.

As the extra cost involved will be small compared with the efficiency to be gained, I am of opinion that this scheme, if approved by Government, might be given effect to immediately.

Reconstitution of Circles of Superintendence.

Adverting to your letter No.17911-12 dated 6th May 1947 on the above subject addressed to the Chief Engineer for Roads & Buildings and copied to me, and stating that the proposals are awaited from me, I have the honor to state as follows:-

2. Consequent on the taking up of large works, both irrigation and roads and buildings, the administrative work in the Mysore and Shimoga Circle Offices has considerably increased. As a measure of relief suitable redistribution of work among the existing three sanctioned Circles is proposed.

3. I am enclosing herewith two maps of the State, one showing the jurisdiction of Mysore and Shimoga Circles as at present constituted, and the other showing the distribution of Divisions after the formation of the proposed Circle with Bangalore as Headquarters. It could be seen that with the proposals as visualised with the three Circles - the Irrigation Circle being merged in the reorganised Mysore Circle - the jurisdictions will be more compact and each Superintending Engineer will have administrative control over three Districts. That the Mysore Circle, existing as at present, has a wider jurisdiction as compared with the Shimoga and Irrigation Circles could be vividly seen by the enclosed comparative "Grant & Outlay" statement of the three Circles during the years 1942-43 to 1946-47, to end of March 1947. It is noted that the "Grant & Outlay" in the Mysore Circle during the years under examination exceed the sum total of corresponding figures in the Shimoga and Irrigation Circles put together. It is therefore urgent and necessary to relieve the strain from the Mysore Circle.

23/6

4. The Irrigation Circle, as at present proposed, will control over the Mysore and Mandya Divisions, and the Buildings Division at

Mysore as well. This additional work proposed to be added on to the Irrigation Circle requires strengthening of sanction existing staff in the Circle Office and I enclose herewith a proposition statement showing the existing and proposed establishment. The additional staff is absolutely necessary to cope up with the increased work in the Circle Shivamogga Quarters to K beat Bangalore to Sirsi or Bangalore Kolar & Tumkur Dt

5. The Chief Engineer for Roads & Buildings, while indicating the formation of three Circles, has referred to the Minor Tank Restoration Ranges also coming within the purview of each of the three Circles. In this connection, I invite kind reference to Government Order No. P.W. 3555-69 | Irma-45-456 dated 6. 12. 1946. passing orders on the Rs. 2 crore scheme of Restoration of Minor Tanks. In view of the very extensive and intensive nature of work that is involved, Government have been pleased to sanction a Superintending Engineer for administering this work requiring concentrated attention. Proposals for the formation of twelve Ranges are before Government and it is proposed to constitute this Circle after all the Ranges are fully constituted and the work is in swing. It is imperative therefore that these are not included within the compass of the proposed distribution of the work in the three Circles, and that the Minor Tank Restoration Circle should exist as such to perform its specific duties. This question need not be mixed up with the present proposal.

6. I request that sanction of Government to the above proposals may kindly be obtained and communicated very early; approval to arrange for the work of Divisions as indicated above from 1st July 1947, pending sanction to these proposals, may also be kindly communicated.

I have the honour to be,
Sir,
Your most obedient servant,

M. Narasimhaiya
Chief Engineer for Irrigation.
20/6/47

may be allowed to remain as it is with jurisdiction over the Irrigation and all Divisions in Mysore and Mandya Districts, which are in charge of Irrigation works, and old and new Channels in Mysore, Mandya and Hassan districts. The old channels like the Hullahally Channel, Ramasamudra Channel (Mandya), Nidalur and Hanumanthapura Channels require remodelling immediately. In addition, the Irrigation Circle is in charge of the Vanivilas Reservoir Project at an estimated cost of Rs 81·0 lakhs recently sanctioned by Govt. In these circumstances, Govt. feel that it is not desirable to take on any more work to that circle.

4. Govt. are therefore pleased to direct that the work and charges be redistributed among the existing two Circles at Shimoga and Mysore and the new Circle sanctioned in the G.O. dated

X and all the minor Tank Restoration Works in these Ranges in these districts.

ORDER No.P.W. 4449-54/Ex-147 46-2

Dated Bangalore 30th September 1947.

There are at present two circles of Superintendence in the State excluding the Irrigation Circle which is in charge of all the Irrigation Divisions in Mysore, Mandya and Hassan districts. The Superintending Engineer, Mysore Circle, is in charge of all the Divisions in Bangalore, Tumkur and Kolar Districts and all the roads and buildings in Mysore and Mandya Districts. The Superintending Engineer, Shimoga Circle, is in charge of all the divisions in Shimoga, Chickmagalur, Chitaldrug and Hassan Districts including the Irrigation Division at Chitaldrug. The Chief Engineer for Roads and Buildings, has reported that on account of a large number of road and building works undertaken in recent times and also of a large number of irrigation works taken up in Chitaldrug district, the work in both the circles has increased enormously involving great delay in the scrutiny and submission of estimates to the Central Office. He has, therefore, proposed that an additional circle may be constituted to give relief to the two existing circles by appropriately distributing the work among the three circles.

2. The Chief Engineer for Irrigation has forwarded proposals for redistributing the work among the existing two circles and the Irrigation Circle, taking on the roads and building Divisions of Mysore and Mandya Districts also to the Irrigation Circle with headquarters at Mysore. He further proposes to shift the headquarters of the Mysore Circle Office to Bangalore with jurisdiction over all the Division Offices in Bangalore, Kolar and Tumkur Districts, the new circle being left solely in charge of Canal Ranges constituted for restoring minor tanks in the State.

3. The arrangement proposed by the Chief Engineer for Irrigation gives no relief whatsoever to the Superintending -

A

IIPS
30/9/47

Engineer, Chitra Circle. Government, therefore, consider that the Irrigation Circle may be allowed to remain as it is with jurisdiction over the Krishnarajasagara works and all the Divisions in Mysore and Mandya Districts, which are in charge of Irrigation works, and old and new channels in Mysore, Mandya and Hassan Districts and all the minor tank restoration ranges in Mysore District. The old channels like the Hullehally channel, Nanjangud channel, [illegible] and Kannambadi channels require re-modelling immediately. In addition the Irrigation Circle is in charge of the Hemavathi Reservoir Project costing Rs.81.0 lakhs recently sanctioned by Government. In these circumstances, Government feel that it is not desirable to take on any more work to that Circle.

4. Government are, therefore, pleased to direct that the Divisional charges be redistributed among the existing two circles at Chitra and Mysore and the new circle sanctioned in the G.O. dated 6-11-1946 read above with Headquarters at Tumkur as noted hereunder:-

(i) The Mysore Circle of Superintendence: (Mysore Head quarters) Permanent.

Mysore Division; Building Division, Mysore, Mandya Division, Bangalore Division, Bangalore Building Division, and all minor tanks restoration ranges in Mandya and Bangalore Districts.

(ii) Chitra Circle of Superintendence: (Chitradurga Headquarters) Permanent.

Chitra Division; Hadur Division; Hassan Division: and all minor tanks Restoration Ranges in the Districts.

(iii) Tumkur Circle of Superintendence: (Tumkur Headquarters) Temporary. (Newly constituted)

Tumkur Division, Kolar Division, Chitaldrug Division, Irrigation Division at Chitaldrug and all minor tanks Restoration Ranges in these districts.

5. Sanction is accorded to the establishment of staff as noted in the annexure on account of the formation of another Circle of Superintendence.

6. [illegible] redistribution of jurisdiction of the circles, Government feel that the work in the Mysore Circle will be comparatively reduced. The Chief Engineer is therefore, requested to submit proposals for redistribution of establishment among the three circles as now reconstituted, taking the present sanctioned strength of establishment of the Mysore and Chitra Circles and that now sanctioned for the third circle.

7. The Lakhavalli Reservoir circle and [illegible] Circle with their divisions will continue as hitherto, as per existing sanction.

7. Further letter No. 5036—E., dated 23rd January 1947, from the Chief Engineer for Irrigation, regarding posting of a Superintending Engineer to work out the scheme both of restoration and maintenance of minor tanks in the State.

ORDER THEREON No. P.W. 4449-54—EST. 147-46-2, DATED BANGALORE, THE 30TH SEPTEMBER 1947.

There are at present two Circles of Superintendence in the State excluding the Irrigation Circle which is in charge of all the Irrigation Divisions in Mysore, Mandya and Hassan Districts. The Superintending Engineer, Mysore Circle, is in charge of all the divisions in Bangalore, Tumkur and Kolar Districts and all the roads and buildings in Mysore and Mandya Districts. The Superintending Engineer, Shimoga Circle, is in charge of all the divisions in Shimoga, Chikmagalur, Chitaldrug and Hassan Districts including the Irrigation Division at Chitaldrug. The Chief Engineer for Roads and Buildings, has reported that on account of a large number of road and building works undertaken in recent times and also of a large number of irrigation works taken up in Chitaldrug District, the work in both the circles has increased enormously involving great delay in the scrutiny and submission of estimates to the Central Office. He has, therefore, proposed that an additional circle may be constituted to give relief to the two existing circles by appropriately distributing the work among the three circles.

2. The Chief Engineer for Irrigation has forwarded proposals for redistributing the work among the existing two circles and the Irrigation Circle, tacking on the Roads and Building Divisions of Mysore and Mandya Districts also to the Irrigation Circle with headquarters at Mysore. He further proposes to shift the headquarters of the Mysore Circle Office to Bangalore with jurisdiction over all the Division Offices in Bangalore, Kolar and Tumkur Districts, a new circle being left solely in charge of special ranges constituted for restoring minor tanks in the State.

3. The arrangement proposed by the Chief Engineer for Irrigation gives no relief whatsoever to the Superintending Engineer, Shimoga Circle. Government, therefore, consider that the Irrigation Circle may be allowed to remain as it is with jurisdiction over the Krishnarajasagara Works and all the Divisions in Mysore and Mandya Districts, which are in charge of irrigation works, and old and new channels in Mysore, Mandya and Hassan Districts and all the minor tank restoration ranges in Mysore District. The old channels like the Hullahally Channel, Ramaswami Channel, Uddur and Hanumanthapur Channels require

No. P. W. 4449-54—Est. 147-46-2, dated 30th September 1947.

immediately. In addition the Irrigation Circle is in charge of the Nugu Reservoir Project costing Rs. 81·0 lakhs recently sanctioned by Government. In these circumstances, Government feel that it is not desirable to tack on any more work to that circle.

4. Government are, therefore, pleased to direct that the divisional charges be re-distributed among the existing two Circles at Shimoga and Mysore and the new circle sanctioned in the Government Order dated 6th December 1946 read above with headquarters at Tumkur as noted hereunder:—

(*i*) **The Mysore Circle of Superintendence: (Mysore Headquarters) Permanent.**

Mysore Division, Buildings Division, Mysore, Mandya Division, Bangalore Division, Bangalore Buildings Division, and all minor tanks restoration ranges in Mandya and Bangalore Districts.

(*ii*) **Shimoga Circle of Superintendence: (Shimoga Headquarters) Permanent.**

Shimoga Division, Kadur Division, Hassan Division, and all minor tanks restoration ranges in these districts.

(*iii*) **Tumkur Circle of Superintendence (Tumkur Headquarters) Temporary (Newly constituted).**

Tumkur Division, Kolar Division, Chitaldrug Division, Irrigation Division at Chitaldrug, and all minor tanks restoration ranges in these districts.

5. Sanction is accorded to the entertainment of staff as noted in the Annexure on account of the formation of another Circle of Superintendence.

6. With the re-distribution of jurisdiction of the circles, Government feel that the work in the Mysore Circle will be comparatively reduced. The Chief Engineer is, therefore, requested to submit proposals for re-distribution of establishment among the three circles as now reconstituted, taking the present sanctioned strength of establishment of the Mysore and Shimoga Circles and that now sanctioned for the third circle.

7. The Lakkavalli Reservoir Circle and Jog Power Scheme Circle with their divisions will continue as hitherto, as per existing sanction.
